Education

New Jersey Institute of Technology: (Jan 2022-Dec 2023)
Master's in computer science (GPA: 3.83)
KGCECollege of Engineering, University of Mumbai: (Aug 2014-May 2018)
bachelor's in computer science (GPA: 3.62)

Technical Skills

Large Language Models	Open AI ChatGPT, GitHub Copilot, Google Gemini, SBERT, Hugging Face, Groq
Web Technologies	HTML5, CSS, JavaScript, ReactJS, NodeJS, Angular
Databases	MySql
Tools	VS code, Tableau, Github, Postman, UiPath, Mainframe, Jupyter Notebook, Ananconda
Cloud Technologies	AWS, Salesforce
Programming Languages	JAVA, Python

Professional Experience

Associate CVS (**Through Cognizant**)

- Developed automation using UI Path for the QLFEED CTE process**,** reducing manual effort for the team.
- Performing daily shakeout through UI path scripts for CTE applications.
- Developing UiPath automation for the Member Creation Tool (Commercial and MEDD), reducing manual effort and improving process efficiency.
- Raising incidents in ServiceNow for identified issues and coordinating triage calls with cross-functional teams to facilitate timely issue resolution.
- Performed post-deployment validation during late-night and major production releases, ensuring all CTE applications are functioning correctly.

Salesforce Developer AvideonCRM LLC

- Built and customized Lightning record pages to enhance UX and improve data visibility for different teams.
- Configured Auto-Response Rules and Email Templates (Classic & Lightning) to streamline customer communication.
- Created and managed Agentforce workflows and actions to automate support tasks and integrate with external APIs.
- Developed and deployed Salesforce Surveys to capture customer feedback linked them with program enrollments and case closure processes.
- Created and managed Agentforce workflows and actions to automate support tasks and integrate with external APIs.
- Built Agentforce agents to facilitate customer support processes, such as handling common inquiries, scheduling tasks, and retrieving records automatically.
- Collaborated with cross-functional teams to ensure smooth integration of Salesforce features with existing business operations.

Software Engineer, Sansar Tec

- Developed front-end for Hireaide, an AI-driven interview automation platform using React.js
- Integrated large language models such as SBERT and Hugging Face Transformers to enhance semantic understanding and resume-job matching accuracy, resulting in a 20% reduction in manual processing time during the hiring process.
- Designed UX/UI interfaces for Hireaide using UX Pilot**,** focusing on candidate experience and intuitive interaction flows.
- Automated extraction of candidate details (name, email, skills) from resumes using UiPath Studio.
- Built UiPath workflows to transfer extracted data into Excel.

Academic assistant, New Jersey Institute of Technology

- Managed daily operations of the office, including scheduling meetings and appointments.
- Compiled reports using Excel spreadsheets and PowerPoint presentations, emphasizing technical expertise.
